## GSE

The global design and engineering  
company

Building structures

We offer the most effective solutions at the most optimal price

## Areas of work

### Building structures

"GSE" develops complex construction projects (Architectural Solutions, Steel Structures, Reinforced Concrete Structures) for heavy industry (Metallurgy, Mining, Petrochemical, Processing, etc.) and infrastructure facilities.

The development is performed using the Autodesk Revit, AutoCad, Tekla software, and calculations are executed in SCAD and Autodesk Robot Structural Analysis. The work is carried out by skilled professionals in the industry having the solid experience.

## Who we are

The team of professionals founded in 2011 focused on the full cycle of designing activities related to the construction and reconstruction of the industrial infrastructure objects of all levels of complexity
